This book analyzes the role that human forms play in visualizing practical information and in making that information understandable, accessible, inviting, and meaningful to readers—in short, "humanizing" it. Although human figures have long been deployed in practical communication, their uses in this context have received little systematic analysis. Drawing on rhetorical theory, art history, design studies, and historical and contemporary examples, the book explores the many rhetorical purposes that human forms play in functional pictures, including

empowering readers, narrating processes, invoking social and cultural identities, fostering pathos appeals, and visualizing data. The book is aimed at scholars, teachers, and practitioners in business, technical, and professional communication as well as an interdisciplinary audience in rhetoric, art and design, journalism, engineering, marketing, science, and history.

This full-color atlas is a step-by-step, visual guide to the most common procedures in emergency medicine. Procedures are described on a single page, or two-page spreads, so

that the physician can quickly access and review the procedure at hand. The atlas contains more than 600 diagnostic algorithms, schematic diagrams and photographic illustrations to highlight the breadth and depth of emergency medicine. Topics are logically arranged by anatomic location or by type of procedure and all procedures are based on the most current and evidence-based practices known.

Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since
