Look, a White! returns the problem of whiteness to white people. Prompted by Eric Holder's charge, that as Americans, we are cowards when it comes to discussing the issue of race, noted

philosopher George Yancy's essays map out a structure of whiteness. He considers whiteness within the context of racial embodiment, film, pedagogy, colonialism, its "danger," and its position within the work of specific writers. Identifying the embedded and opaque ways white power and privilege operate, Yancy argues that

the Black countergaze can function as a "gift" to whites in terms of seeing their own whiteness more effectively.

Throughout *Look, a White!* Yancy pays special attention to the impact of whiteness on individuals, as well as on how the structures of whiteness limit the capacity of social actors to completely

advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and
