A deeply reported exploration of Joe Biden as told through his extended family.

Prior to the Nixon administration, environmental policy in the United States was rudimentary at best. Since then, it has evolved into one of the primary concerns of governmental policy from the federal to the local level. As scientific expertise on the environment rapidly developed, Americans became more aware of the growing environmental crisis that surrounded them. Practical solutions for mitigating various aspects of the crisis - air pollution, water pollution,

chemical waste dumping, strip mining, and later global warming - became politically popular, and the government responded by gradually erecting a vast regulatory apparatus to address the issue. Today, politicians regard environmental policy as one of the most pressing issues they face. The Obama administration has identified the renewable energy sector as a key driver of economic growth, and Congress is in the process of passing a bill to reduce global warming that will be one of the most important environmental policy acts in decades. The Oxford Handbook of U.S. Environmental Policy will be a state-of-the-art work on all aspects of environmental policy in

America. Over the past half century, America has been the world's leading emitter of global warming gases. However, environmental policy is not simply a national issue. It is a global issue, and the explosive growth of Asian countries like China and India mean that policy will have to be coordinated at the international level. The book will therefore focus not only on the U.S., but on the increasing importance of global policies and issues on American regulatory efforts. This is a topic that will only grow in importance in the coming years, and this will serve as an authoritative guide to any scholar interested in the issue.

What is a rubric? A rubric is a

coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right?

Unfortunately, rubrics are commonly misunderstood and misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: (1) criteria that relate to the learning (not the "tasks") that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She outlines the difference

between various kinds of rubrics (for example, general versus task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights examples from all grade levels and assorted content areas. In addition, Brookhart addresses \*

- \* Common misconceptions about rubrics;
- \* Important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful; and \*
- \* How to use rubrics for formative assessment and grading, including standards-based grading and report card grades.

Intended for educators who are already familiar with rubrics as well as those who are not, this

book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources. And it makes the case that rubrics, when used appropriately, can improve outcomes by helping teachers teach and helping students learn.

The Medicaid and CHIP Payment and Access Commission (MACPAC) was established in the Children's Health Insurance Program Reauthorization Act of 2009, and its charge was later revised in the Patient Protection and Affordable Care Act of 2010. The Commission is a non-partisan, federal, analytic resource for the Congress on

Medicaid and CHIP. MACPAC is the first federal agency charged with providing policy and data analysis to the Congress on Medicaid and CHIP, and for making recommendations to the Congress and the Secretary of the U.S. Department of Health and Human Services on a wide range of issues affecting these programs. The Commission conducts independent policy analysis and health services research on key Medicaid and CHIP topics, including but not limited to: eligibility, enrollment, and benefits; payment; access to care; quality of care; interactions of Medicaid and CHIP with Medicare and the health care system generally; and data development to support policy

analysis and program accountability. The Commission's reports provide the Congress with a better understanding of the Medicaid and CHIP programs, their roles in the U.S. health care system, and the key policy and data issues outlined in the Commission's statutory charge. In this report, the Commission examines several issues including Medicaid and CHIP eligibility and coverage for maternity services, the newly implemented increase in physician payment for primary care services, access to care for non-elderly persons with disabilities, the availability of Medicaid and CHIP data that can be used for oversight and program monitoring, and improving the effectiveness of

program integrity activities. As purchasers of maternity services, Medicaid and CHIP paid for 1.8 million births in 2010, roughly half of all births in many states. States and the federal government have an interest in maximizing positive birth outcomes for all families, particularly those financed with taxpayer dollars. This chapter explores Medicaid and CHIP eligibility and coverage for these services, including enrollment and spending information and also highlights provisions of the ACA that affect eligibility for maternity services in Medicaid, CHIP, and health insurance exchanges. The chapter on Medicaid primary care physician payment focuses on a specific provision of the ACA that became

effective in January 2013: increasing Medicaid fees to Medicare payment levels for primary care services provided by primary care physicians. The provision is effective for 2013 and 2014 with the federal government paying 100% of the costs of the difference in fees. To better understand how the provision is being implemented by state Medicaid programs and its impact on beneficiary access and provider participation, we examined the relevant research literature and conducted interviews with states, providers, and other key stakeholders. The feedback received highlights the challenges of implementing this provision and the need for broader investigation into various

options to address access gaps in Medicaid. In this report, the Commission builds on previous analyses related to persons with disabilities. Medicaid is an important source of coverage for these individuals, providing services not typically covered by Medicare or private insurers. This report includes a review on access to care for non-elderly adults with disabilities, highlights gaps in existing research, and suggests areas for additional research and analysis. It also focuses on the importance of having accurate, timely, and nationally comparable data on Medicaid and CHIP in order to answer key policy questions that affect enrollees, states, the federal government, health care

providers, and others—and in ensuring accountability for taxpayer dollars. This chapter updates the Congress on progress that has been made in improving federal administrative data and identifies areas where additional improvements would benefit policymaking at the federal level.

For much of the past century, public discourse about gender and politics has been driven largely by progressive women--those voices on the left that support policies widely considered to be pro-women. Little scholarly attention has been paid to the dialogue of conservative women, and what literature there is tends to focus on specific issues rather than

The narratives and policy positions of Condoleezza Rice, Nikki Haley, Teri Lynn Land, Susana Martinez, Joni Ernst and others are examined for the ways in which they frame their political images as women in the GOP.
