Question: What is the name of the theoretical explanation of the behaviour of subatomic particles offered by British physicist P.A.M. Dirac in the 1920s? Answer: In 1927 P.A.M. Dirac provided the foundations for a theory that explained the phenomena of subatomic particles with his quantum theory of the electromagnetic field. Dirac's theory treated the electromagnetic field as a "gas" of photons (the quanta of light), and it yielded a correct description of the absorption and emission of ...
