Black Emu

Dark Emu: Black Seeds: Agriculture or Accident? is a 2014 non-fiction book by Bruce Pascoe. It reexamines colonial accounts of Aboriginal people in Australia, and cites evidence of pre-colonial agriculture, engineering and building construction by Aboriginal and Torres Strait Islander peoples. A second edition, published under the title Dark Emu: Aboriginal Australia and the Birth of ...

To accept that the claims put forth in "Dark Emu" are true one must believe that a vast assemblage of accounts by European explorers, settlers and government officials as well as hundreds of anthropological studies have all conspired to successfully hide the existence of an advanced Aboriginal civilization and falsely present it as being only at a primitive hunter/gatherer level.

Many parents think Young Dark Emu is far too racist, violent and just plain wrong about our Australian History. Our children's mental well-being, and our society's cohesiveness between Aboriginal people and other Australians, is far too important to be left to teachers trying to indoctrinate our schools with this false re-writing of our Australian history.

Dark Emu puts forward an argument for a reconsideration of the hunter-gatherer tag for pre-colonial Aboriginal Australians. The evidence insists that Aboriginal people right across the continent were using domesticated plants, sowing, harvesting, irrigating and storing - behaviors inconsistent with the hunter-gatherer tag. Gerritsen and Gammage in their latest books support this premise but Pascoe takes this further and challenges the hunter-gatherer tag as a convenient lie. Almost all the evidence comes from the records and diaries of the Australian explorers, impeccable sources.

Dark Emu injects a profound authenticity into the conversation about how we Australians understand our continent ... [It is] essential reading for anyone who wants to understand what Australia once was, or what it might yet be if we heed the lessons of long and sophisticated human occupation. Judges for 2016 NSW Premier's Literary Awards Dark Emu puts forward an argument for a reconsideration of the hunter-gatherer tag for pre-colonial Aboriginal Australians. The evidence insists that Aboriginal people right across the continent were using domesticated plants, sowing, harvesting, irrigating, and storing behaviours inconsistent with the hunter-gatherer tag. Gerritsen and Gammage in their latest books support this premise but Pascoe takes this further and challenges the hunter-gatherer tag as a convenient lie. Almost all the evidence in Dark Emu comes from the records and diaries of the Australian explorers,

impeccable sources. Bruce's comments on his book compared to Gammage's: "My book is about food production, housing construction and clothing, whereas Gammage was interested in the appearance of the country at contact. [Gammage] doesn't contest hunter gatherer labels either, whereas that is at the centre of my argument."

Longlisted for the CBCA 2020 Eve Pownall Award for Information Books *Winner of the Booksellers' Choice 2020 Children's Book of the Year Award* *Shortlisted for the 2020 NSW Premier's Literary Awards Patricia Wrightson Prize for Children's Literature* *Shortlisted for the ABIA Book of the Year for Younger Children (ages 7-12)* *Shortlisted for the Indie Book Awards 2020: Children's* Age range 10+. The highly-anticipated junior version of Bruce Pascoe's multi award-winning book. Bruce Pascoe has collected a swathe of literary awards for Dark Emu and now he has brought together the research and compelling first person accounts in a book for younger readers. Using the accounts of early European explorers, colonists and farmers, Bruce Pascoe compellingly argues for a reconsideration of the hunter-gatherer label for pre-colonial Aboriginal Australians. He allows the reader to see Australia as it was before Europeans arrived - a land of cultivated farming areas, productive fisheries, permanent homes, and an understanding of the environment and its natural resources that supported thriving villages across the continent. Young Dark Emu - A Truer History asks young readers to consider a different version of Australia's history pre-European colonisation. 'Adapted for a younger readership from Pascoe's best-selling Dark Emu, this exquisitely illustrated picture book will transform how we see Australian history. Bruce uses the diaries of early explorers and colonists to show us the Australia where Aboriginal people built houses,

File Type PDF Black Emu

dams and wells and farmed the land.' □ Fiona Stager, The Courier Mail

Australians' understanding of Aboriginal society prior to the British invasion from 1788 has been transformed since the publication of Bruce Pascoe's *Dark Emu* in 2014. It argued that classical Aboriginal society was more sophisticated than Australians had been led to believe because it resembled more closely the farming communities of Europe. In *Farmers or Hunter-gatherers?* Peter Sutton and Keryn Walshe ask why Australians have been so receptive to the notion that farming represents an advance from hunting and gathering. Drawing on the knowledge of Aboriginal elders, previously not included within this discussion, and decades of anthropological scholarship, Sutton and Walshe provide extensive evidence to support their argument that classical Aboriginal society was a hunter-gatherer society and as sophisticated as the traditional European farming methods. *Farmers or Hunter-gatherers?* asks Australians to develop a deeper understanding and appreciation of Aboriginal society and culture.

'*Dark Emu* injects a profound authenticity into the conversation about how we Australians understand our continent ... [It is] essential reading for anyone who wants to understand what Australia once was, or what it might yet be if we heed the lessons of long and sophisticated human occupation.' Judges for 2016 NSW Premier's Literary Awards *Dark Emu* puts forward an argument for a reconsideration of the hunter-gatherer tag for pre-colonial Aboriginal Australians. The evidence insists that Aboriginal people right across the continent were using domesticated plants, sowing, harvesting, irrigating, and storing -- behaviours inconsistent with the hunter-gatherer tag. Gerritsen and Gammage in their latest books support this premise but

Pascoe takes this further and challenges the hunter-gatherer tag as a convenient lie. Almost all the evidence in *Dark Emu* comes from the records and diaries of the Australian explorers, impeccable sources. Bruce's comments on his book compared to Gammage's: " My book is about food production, housing construction and clothing, whereas Gammage was interested in the appearance of the country at contact. [Gammage] doesn't contest hunter gatherer labels either, whereas that is at the centre of my argument."

Reveals the complex, country-wide systems of land management used by Aboriginal people in presettlement Australia *Across Australia*, early Europeans commented again and again that the land looked like a park, with extensive grassy patches and pathways, open woodlands, and abundant wildlife. Bill Gammage has discovered this was because Aboriginal people managed the land in a far more systematic and scientific fashion than most people have ever realized. For more than a decade, he has examined written and visual records of the Australian landscape. He has uncovered an extraordinarily complex system of land management using fire, the life cycles of native plants, and the natural flow of water to ensure plentiful wildlife and plant foods throughout the year. Aboriginal people spent far less time and effort than Europeans in securing food and shelter, and this book reveals how. Once Aboriginal people were no longer able to tend their country, it became overgrown and vulnerable to the hugely damaging bushfires Australians now experience. With details of land-management strategies from around Australia, this book rewrites the history of the continent, with huge implications for today.

File Type PDF Black Emu

Would Blaxland, Wentworth and Lawson have ever crossed the Blue Mountains without the help of the local Aboriginal people? The invaluable role of local guides in this event is rarely recognised. As silent partners, Aboriginal Australians gave Europeans their first views of iconic animals, such as the Koala and Superb Lyrebird, and helped to unravel the mystery of the egg-laying mammals: the Echidna and Platypus. Well into the twentieth century, Indigenous people were routinely engaged by collectors, illustrators and others with an interest in Australia's animals. Yet this participation, if admitted at all, was generally barely acknowledged. However, when documented, it was clearly significant. Penny Olsen and Lynette Russell have gathered together Aboriginal peoples' contributions to demonstrate the crucial role they played in early Australian zoology. The writings of the early European naturalists clearly describe the valuable knowledge of the Indigenous people of the habits of Australia's bizarre (to a European) fauna. 'Australia's First Naturalists' is invaluable for those wanting to learn more about our original inhabitants' contribution to the collection, recognition and classification of Australia's unique fauna. It heightens our appreciation of the previously unrecognised complex knowledge of Indigenous societies.

A collection of stories and essays by the award-winning author of Dark Emu, showcasing his shimmering genius across a lifetime of work. This volume of Bruce Pascoe's best and most celebrated stories and essays, collected here for the first time, traverses his long career and explores his enduring fascination with Australia's landscape, culture and history. Featuring new fiction alongside Pascoe's most revered and thought-provoking nonfiction – including from his modern classic Dark Emu – Salt distils the intellect, passion and virtuosity of his work. It's
