The Poverty of Privacy Rights makes a simple, controversial argument: Poor mothers in America have been deprived of the right to privacy. The U.S. Constitution is supposed to bestow rights equally. Yet the poor are subject to invasions of privacy that can be perceived as gross demonstrations of governmental power without limits. Courts have routinely upheld the constitutionality of privacy invasions on the poor, and legal scholars typically understand marginalized populations to have "weak versions" of the privacy rights everyone else enjoys. Khiana M. Bridges investigates poor mothers' experiences with the state--both when they receive public assistance and when they do not. Presenting a holistic view of just how the state intervenes in all facets of poor mothers' privacy, Bridges shows how the Constitution has not been interpreted to bestow these women with family, informational, and reproductive privacy rights. Bridges seeks to turn popular thinking on its head: Poor mothers' lack of privacy is not a function of their reliance on government assistance--rather it is a function of their not bearing any privacy rights in the first place. Until we disrupt the cultural narratives that equate poverty with immorality, poor mothers will continue to be denied this right.

In Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, Teaching with Poverty in Mind reveals * What poverty is and how it affects students in school; * What drives change both at the macro level (within schools and districts) and at the micro level (inside a student's brain); * Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and * How to engage the resources necessary to make change happen. Too often, we talk about change while maintaining a culture of excuses. We can do better. Although no magic bullet can offset the grave challenges faced daily by disadvantaged children, this timely resource shines a spotlight on what matters most, providing an inspiring and practical guide for enriching the minds and lives of all your students.
