the project and make sure that “Enable Docker Support” option is selected with OS type as Linux. The solution will look as shown below.

Microservices Using ASP.NET Core - C# Corner

Building microservices with ASP.NET Core (without MVC) There are several reasons why it makes sense to build super-lightweight HTTP services (or, despite all the baggage the word brings, “microservices”). I do not need to go into all the operational or architectural benefits of such approach to system development, as it has been discussed a lot elsewhere.
