Chapter 7 The Central
Nervous System
Answer Key
ICSE Selina Class 8
Biology Chapter 7 –
The Nervous System
explains about the
system that consists

File Type PDF

Chapter 7

of the brain, the spinal cord, and an enormous network of nerves that are spread throughout the body which is responsible for sending, receiving and processing the messages in the form of chemical signals, called impulses.

The Central Nervous
System. The central
nervous system
(CNS) is made up of
the brain and spinal

File Type PDF

Chapter 7

Cord and is covered

with three layers of protective coverings called meninges

("meninges" is derived from the Greek and means "membranes")

(Figure 5.3). The outermost layer is the dura mater, the middle layer is the web-like arachnoid mater, and the inner

File Type PDF

Chapter 7

layer is the pia mater, which directly contacts and covers the brain and spinal cord.

Chapter 5: The Nervous System – NSCC Human Biology
The central nervous system (CNS) is made up of two organs: the brain and the spinal cord. These

File Type PDF

Chapter 7

Organs receive information from the outside world

(sensory), process that information, and send a response to the body (motor). The peripheral nervous system (PNS) is made of all the nerves that arise from the brain and spinal cord, and then travel throughout the body.
