The European Computer Users Handbook 1968/69, Sixth Edition is a handbook of computers and computer peripherals which could be used in Europe. Details of computers and peripheral devices, including analog computers, calculators, and data transmission equipment, are presented. This book is organized into 10 sections and begins by giving information on digital computers that could be used in Europe based on recommendations by Computer Consultants Limited. Comments on the particular computer manufacturer concerned are included and the particular item of equipment is described. Digital computers, electronic calculators, analog computers, peripheral equipment, and data transmission equipment available in Europe are then listed. The names and addresses of computer manufacturers and selling organizations concerned with computers used in Europe are also provided. Two tables are given: one for computer installations by number, import value, and home built value in sixteen European countries, and another for computer installations in the United States. This monograph will be a valuable resource for both computer users and manufacturers.
