## Dirichlet

In a Dirichlet problem, we seek a harmonic function that satisfies the differential equation (6.17) in the solution domain,  $\Omega$ , while constant values of the potential are enforced at every point of the boundary,  $\partial\Omega$ , i.e. (6.28)  $\phi = \phi_B(x, y)$  Under these conditions, a unique solution of Eq. (6.17) is guaranteed.
