From the dream team of Dr. Walter C. Willett, bestselling author of Eat, Drink and Be Healthy, and Mollie Katzen, author of the four million-copy bestselling Moosewood Cookbook, comes a new approach to weight loss Eat, Drink, and Weigh Less offers a medically sound, extremely effective program that shows people how they can lose weight by adding delicious food to their diet and making simple changes in what they eat throughout the day. It's flexible and adaptable--and it really works. It features a powerful way to chart your progress called the Body Score, the more you raise your Body Score, the more you will lower your weight! A quiz at the beginning of the book helps readers determine their Body Score; the chapters that follow explain easy dietary and behavioral steps readers can take to improve their scores. While the concept is simple, the science behind it is not. It represents years of top research conducted by Dr. Walter C. Willett, the head of Harvard School of Public Health's Department of Nutrition, including the famous Nurses Health Study. This study scored each of its over 84,000 participants on food choices, exercise schedule, and body mass--resulting in a number that accurately determined the nurses risk of heart disease. Now, for the first time, Dr. Willett has teamed up with mega-bestselling cookbook author Mollie Katzen to adapt a similar, much easier scoring system to create a user-friendly diet plan with fail-safe results. If you can raise your score, you will lower your weight--all while eating delicious, easy-to-prepare foods.

"Investigative journalist Barry Estabrook was often on the receiving end of his doctor's scowl. Realizing he had two options--take more medication or lose weight--Estabrook chose the latter, but was paralyzed by the options. Which diet would keep the weight off? What program could he maintain over time? What diet works best--or even at all? Over the course of three years, Estabrook tried the regimens behind the most popular diets of the past forty years--from paleo, keto, gluten-free, and veganism to the Master Cleanse, Whole30, Atkins, Weight Watchers--examining the people, claims, and science behind the fads, all while recording his mental and physical experience of following each one. Along the way, he discovered that all the branded programs are derived from just three diets. There are effective, scientifically valid takeaways to be cherry-picked . . . and the rest is just marketing. Perhaps most alarming, Estabrook uncovered how short-term weight loss can do long-term health damage that may go undetected for years. Estabrook contextualizes his reporting with an analysis of our culture's bizarre dieting history, dating back to the late 1800s, to create a thorough--and thoroughly entertaining--look at what specific diets do to our bodies, why some are more effective than others, and why our relationship with food is so fraught."--Provided by publisher.

Discover the original international diet sensation—used by Adele, heavyweight champion David Haye, and Pippa Middleton—that will help you lose seven pounds in seven days while experiencing lasting energy and eating all the foods you love. Over the past few years, fasting has become a popular diet option. Studies show that fasting—whether through moderate calorie restriction every day or the more severe but less frequent intermittent fasting—can help people lose about thirteen to fourteen pounds in six months and reduce their risk of developing disease. When we fast, our body's energy stores activate what is known as sirtuins, or the "skinny gene," and many positive changes ensue. Fat storage is switched off, and our body stops its normal growth processes and goes into "survival" mode. Fat burning is stimulated and the genes involved in the repair and rejuvenation of our cells are turned on—which all results to weight loss and improved resistance to disease. But if not done correctly, fasting can lead to hunger, irritability, fatigue, and loss of muscle. Enter Sirtfoods: a newly discovered group of foods that is revolutionizing healthy eating. Ranging from chocolate and red wine to garlic and walnuts, sirtfoods are particularly rich in special nutrients that help us activate the same skinny genes in our bodies that fasting triggers. Nutritionists Aidan Goggins and Glen Matten have created *The Sirtfood Diet* to help you effectively lose weight and improve your resistance to disease, while still giving you incredible energy and glowing health.
