the-blank exercises help readers better understand chapter content. Study tips in the preface provide insights on the most effective methods for learning and retaining information. Answers to exercises in the back of the book include references to the appropriate textbook page to give readers instant feedback. NEW! Updated art throughout enhances learning by presenting anatomy even more clearly.

The concepts of nutrition encompass two kinds of knowledge and ability; the first one is a knowledge and understanding of the individual nutrients that we need as human beings to work, learn, socialise, and exercise at our best. We need to understand what they are, what they do, and what happens if we do not have these nutrients. The second one is the ability to use these nutrients together to understand which foods they come from and what to do with these foods so that we get all the nutrients we need in the amounts that we need them. This programme looks at nutrition from a holistic point of view that it not only gives facts about the nutrients we need but also looks at what to do with our newfound knowledge and understanding.
