A Textbook of workshop Technology (Manufacturing Processes) for the students of degree and diploma of all the Indian and foreign universities. The object of this book is to present the subject matter in a most concise, compact, to the point and lucid manner. While writing the book, we have constantly kept in mind the various requirements of the students. No effort has been spared to enrich the book with simple language and self-explanatory diagrams. Every care has been taken not to make the book voluminous, as the students have also to face other subjects of equal importance.

The book has been thoroughly revised. Several new articles have been added, specifically, in chapters on mortar, concrete, paint, varnishes, distempers and antitermite treatment to make the book still more comprehensive and a useful unit for the students preparing for the examination in the subject.
