When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine

It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

classic Clarkson, stretching back to the mid-1980s, he's pulled together the car columns and stories with which he made his name. As coal mines closed and house prices exploded to a soundtrack of men in make-up playing synthesizers, Jeremy was already waxing lyrical on topics as useful and diverse as: \* The perils of bicycle ownership \* Why Australians - not Brits - need bull bars \* Why soon only geriatrics will be driving BMWs \* The difficulty of deciding on the best car for your wedding \* Why Jesus's dad would have owned a Nissan Bluebird \* And why it is that bus lanes cause traffic jams Irreverent, damn funny and offensive to almost everyone, this is writing with its foot to the floor, the brake lines cut and the speed limit smashed to smithereens. The riveting memoir of a life lived at the right-hand edge of the speedometer. Alex Roy's father, while on his deathbed, hints about the notorious, utterly illegal cross-country drive from Los Angeles to New York of the 1970s, which then inspired his young son to enter the mysterious world of underground road rallies. Tantalized by the legend of the Driver—the anonymous, possibly nonexistent organizer of the world's ultimate secret race—Roy set out to become a force to be reckoned with. At speeds approaching 200 mph, he sped from London to Morocco, from Budapest to Rome, from San Francisco to Miami, in his highly modified BMW M5, culminating in a new record for the infamous Los Angeles to New York run: 32:07. Sexy, funny, and shocking, *The Driver* is a never-before-told insider's look at an unbelievably fast and dangerous society that has long been off-limits to
