How green is green? The average homeowner is usually well-informed about which products and concepts are considered “green,” but they seem to have less of an understanding of how they compare, and which things work the best for the lowest investment. Did you know that 40 percent of the average home power bill is dedicated to air conditioning in warm climates? Further, energy is spent on cooking, hot water, clothes dryers, and such. Did you know that solar hydronic panels are way more efficient than solar voltaic panels? How about instantaneous water heaters? Are they good? Homeowners need to make dozens of decisions about which products or services they need in order to make their

home the most efficient it can be for the given budget. Do you have mold or humidity problems? If you want to learn about things like the home envelope, HVAC, hot water, and electrical systems, this book is for you. It is written in plain English, and covers all the bases. Also, given are tips on saving the environment from an engineer ' s perspective. The author is a big fan of the environment, but does not like “ greenwashing. ” The generic definition of greenwashing is the practice of making an unsubstantiated or misleading claim about the environmental benefits of a product, service, or technology. Pros and cons of various “ green ” products are discussed so that the homeowner can understand the smartest purchases and practices. One of the things you will learn is that the envelope of the home is just as important as

Among the many books I have read on the cultural evolution taking place in India, this is perhaps the most insightful. It does not just map mindset changes; it does so with the certainty of a person who has lived the changes as much as he has witnessed them. Every marketer should keep this book on his office desk as a ready reckoner. Ranjan Kapur Country Manager – India WPP India in many ways is a "Nation of Nations." So much heterogeneity and hence complexity in understanding consumers and consumerism. Dheeraj has done a commendable job in peeling off the layers from the onion—creating frameworks and providing very relatable examples to understand the culture. For instance, Dheeraj has used Bollywood as an effective mirror to portray societal changes. Consumer India is a must-read

for those who want to understand the cultural evolution of India with its nuances. Rajesh Jejurikar Chief Executive - Automotive Division Mahindra & Mahindra Ltd. A labor of love. For years, I have marveled at how Dheeraj's inquisitive brain continuously churns away to make meaning of everything he observes. His writing simultaneously reflects him as a "sutradhaar" telling the captivating story of a changing India, even as it does so with the unbiased and expert credentials of the "computerji" he describes here. Dheeraj insightfully marries the rapid changes he chronicles with the assimilative fabric of India; where "and" trumps "or." Against the cliché "change is the only constant," he underlines that in India, change works with the constant. Enjoy the ride on Dheeraj's time machine! Prasad
