On the afternoon of September 14, 1786, two French ships appeared off the coast of Monterey, the first foreign vessels to visit Spain's California colonies. Aboard was a party of eminent scientists, navigators, cartographers, illustrators, and physicians. For the next ten days the commander of this expedition, Jean François de La Pérouse, took detailed notes on the life and character of the area: its abundant wildlife, the labors of soldiers and monks, and the customs of Indians recently drawn into the mission. These observations provide a startling portrait of California two centuries ago.

Describes the daily life of people who settled in the California missions, and why the missions were built.

Discusses the history of California missions, their dual purpose of converting people to Catholicism and consolidating Spanish territory, and the daily life of friars and natives.

When you purchase the Library Bound mystery you will receive FREE online eBook access! In two centuries, La Puršsima Concepci3n went from a fledgling frontier mission to a renowned California State Historic Park. Once home to many Spanish soldiers, settlers and hundreds of Chumash Indians, La Puršsima held the seat of the California Mission government under Father Mariano Payeras. It withstood catastrophic events, including widespread disease in early years and a great Southern California earthquake in 1812. Emerging from ruins for the last time in 1934, after restoration by the Civilian Conservation Corps, structures appear today as they did in the early nineteenth century. The uniquely restored California Mission complex operates as a state park in a pastoral setting. Author and archivist Michael R. Hardwick chronicles the story of La Puršsima and the resilient people and culture that made a lasting influence.

“Nothing defines California and our nation’s heritage as significantly or emotionally,” says the California Mission Foundation, “as do the twenty-one missions that were founded along the coast from

San Diego to Sonoma.” Indeed, the missions collectively represent the state’s most iconic tourist destinations and are touchstones for interpreting its history. Elementary school students today still make model missions evoking the romanticized versions of the 1930s. Does it occur to them or to the tourists that the missions have a dark history? *California Mission Landscapes* is an unprecedented and fascinating history of California mission landscapes from colonial outposts to their reinvention as heritage sites through the late nineteenth and twentieth centuries. Illuminating the deeply political nature of this transformation, Elizabeth Kryder-Reid argues that the designed landscapes have long recast the missions from sites of colonial oppression to aestheticized and nostalgia-drenched monasteries. She investigates how such landscapes have been appropriated in social and political power struggles, particularly in the perpetuation of social inequalities across boundaries of gender, race, class, ethnicity, and religion. *California Mission Landscapes* demonstrates how the gardens planted in mission courtyards over the past 150 years are not merely anachronistic but have become potent ideological spaces. The transformation of these sites of conquest into physical and metaphoric gardens has reinforced the marginalization of indigenous agency and diminished the contemporary consequences of colonialism. And yet, importantly, this book also points to the potential to create very different visitor experiences than these landscapes currently do. Despite the wealth of scholarship on California history, until now no book has explored the mission landscapes as an avenue into understanding the politics of the past, tracing the continuum between the Spanish colonial period, emerging American nationalism, and the contemporary heritage industry.
