Elton and Gruber, 1992a, Elton and Gruber, 1992b formulate the asset liability problem, where both assets and liabilities are related to a one-index model, and develop an equilibrium model and a portfolio theory where equilibrium exists but some assets are out of equilibrium. Portfolio theory is a well-developed paradigm. There are excellent textbooks on the subject. Of course, we are especially partial to our own Modern Portfolio Theory and Investment Analysis. There are also good reviews in more advanced doctoral-level texts such as Ingersoll (1987) or Huang and Litzenberger (1988).
