Freedom in the World is the standard-setting comparative assessment of global political rights and civil liberties. The methodology of this survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories.

The methodology of this survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

This yearbook marks the thirteenth year of the Comparative Survey of Freedom and is the seventh edition in the Freedom House series of annual publications. In addition to the ratings and tables of the Comparative Survey, this volume contains an extensive discussion of the criteria for and definitions of freedom. For the first time ever, the yearbook includes the checklist of political rights and civil liberties that forms the basis of the Survey's ratings system. Summary discussions of the status of freedom in each country and related territories are included. This edition also examines the continuing controversy over the role of and regulations appropriate to the news media in the ongoing struggle for greater political, social, and economic freedom. It reports the outcome of a Freedom House-sponsored conference on strengthening American support for liberalization in Eastern Europe. Finally, the volume includes an assessment of the American campaign for democracy in the world and considers the opportunities and strategies appropriate to it.

Our American Government textbook adheres to the scope and sequence of introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project.

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 193 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

Recounting controversial First Amendment cases from the Red Scare era to Citizens United, William Bennett Turner—a Berkeley law professor who has argued three cases before the Supreme Court—shows how we’ve arrived at our contemporary understanding of free speech. His strange cast of heroes and villains, some drawn from cases he has litigated, includes Communists, Jehovah’s Witnesses, Ku Klux Klansmen, the world’s leading pornographer, prison wardens, dogged reporters, federal judges, a computer whiz, and a countercultural comedian. This is a fascinating look at how the scope of our First Amendment freedoms has evolved and the colorful characters behind some of the most important legal decisions of modern times. “Turner tells fascinating stories of unlikely heroes and explains difficult legal issues clearly and concisely, educating and entertaining at the same time.”—Elizabeth Farnsworth, The PBS News Hour

Freedom in the World contains both comparative ratings and written narratives and is now the standard reference work for measuring the progress and decline in political rights and civil liberties on a global basis.

What are the Declaration of Independence, the Bill of Rights, and the U.S. Constitution? They're important documents that helped to shape our country. But what's the story behind how these documents were created? And what exactly do they say? Read this book to find out.

In this Second Edition of this radical social history of America from Columbus to the present, Howard Zinn includes substantial coverage of the Carter, Reagan and Bush years and an Afterword on the Clinton presidency. Its commitment and vigorous style mean it will be compelling reading for under-graduate and post-graduate students and scholars in American social history and American studies, as well as the general reader.
