The esoteric knowledge presented here, represents what are in my belief, some of the most carefully guarded, heavily veiled, and least understood secrets of biblical wisdom traditions. Many have stumbled upon this knowledge without necessarily grasping just what the full implications this knowledge means for unlocking and deciphering the riddles

of our Holy Bible as bestowed upon us by our Father Yahweh through the line of prophets and even His only begotten Son Yahushuah Savior Messiah. The secret that unlocks all things biblical is knowledge that Cain was a child of Eve and Lucifer and not the first born son of Adam. Understanding that there are two blood lines upon the planet and that these two bloodlines have been warring with one another since the inception and dawning of humanity upon this world will help one to decipher this critical theme as it plays out through the totality of all available scripture, from the fall to soon coming judgment.

Freedom and its internal relation to reason is fundamental to Descartes' philosophy in general, and to his Meditations on

First Philosophy in particular. Without freedom his entire enquiry would not get off the ground, and without understanding the role of freedom in his work, we could not understand what motivates key parts of his metaphysics. Yet, not only is freedom a relatively overlooked element, but its internal relation to reason has gone unnoticed by most studies of his philosophy. *Self, Reason, and Freedom: A New Light on Descartes' Metaphysics*, by defending freedom's internal relation to reason, sheds new light on Descartes' metaphysics and restores the often dismissed Fourth Meditation to the core of his metaphysics as he conceived it. Implicit in that relation is a rejection of any authority external to reason. Andrea Christofidou shows how this lends strength and explanatory force to Descartes' enquiry, and reveals his

conception of the unity of the self and of its place in the world. *Self, Reason, and Freedom: A New Light on Descartes' Metaphysics* is essential reading for students and scholars of Descartes and anyone studying seventeenth-century philosophy.

"An engrossing tale of obsession, adventure and scientific reasoning." —Betty Ann Kevles, Los Angeles Times In the winter of 1938, a fishing boat by chance dragged from the Indian Ocean a fish thought extinct for 70 million years. It was a coelacanth, which thrived concurrently with dinosaurs and pterodactyls—an animal of major importance to those who study the history of vertebrate life. *Living Fossil* describes the life and habitat of the coelacanth and what scientists have learned about it during fifty years of research. It is an exciting and very human story, filled with ambitious and brilliant people, that reveals much about the practice of modern science.
