The Production Preparations Process (3P) is a powerful means of taking a big-picture look at how a product is designed and manufactured. It guides teams through the creative process of generating ideas, and then whittles the ideas down to one that will be implemented. A 3P project can focus on either the process or on the product design. The goal is to finish the event, usually about a week long, with a good idea of how the design should look, and a good understanding of how it will be built.
