Movement Parts I thought it would be fun  
to show all the parts of this movement. In  
the first photo it has been disassembled  
and is ready for cleaning. You can tell it  
needs cleaning by the black deposits on  
the pivots (the ends of the gear shafts that  
turn in the holes in the brass movement  
plates).

This section is for Weight Driven Clocks Westminster or other 15 Minute melodies not chiming the hour, on the hour. If the clock is chiming prematurely only about 5 minutes or so before it is supposed to chime, on most clocks you can just take off the minute hand and turn the bushing that is in the center of the hand one way or another so it is exactly on the hour when it bongs its melodies.
