Wheel and Pinion Cutting in Horology: A Historical and ...

Antique clock wheel and pinion cutting. For years we have used outworkers to cut wheels and pinions for clocks that we were restoring or rebuilding. The main reason for this was commercial, the cost of the equipment in relation to how much we would actually use it. We were also limited for space in the workshop. In 2018 we decided to invest in the equipment ourselves.

A Historical

Richards of Burton Home

Page - Clock

In the foreground the bars are fed through and the multiple tools either side of the collet in the centre then cut the material. The same process as is used in the previous section on profile turning. These machines can produce the blanks for wheels and pinions which are then cut later in other machines as well as pins, screws, canons etc.
