Now available in paperback, this provocative study examines the street-level decisions made by police, caught between a sometimes hostile community and a maze of departmental regulations. Probing the dynamics of three sample police departments, Brown reveals the factors that shape how officers wield their powers of discretion. Chief among these factors, he contends, is the highly bureaucratic organization of the modern police department. A new epilogue, prepared for this edition, focuses on the structure and operation of urban police forces in the 1980s. "Add this book to the short list of important analyses of the police at work....Places the difficult job of policing firmly within its political, organizational, and professional constraints...Worth reading and thinking about." —Crime & Delinquency "An excellent contribution...Adds significantly to our understanding of contemporary police." —Sociology "A critical analysis of policing as a social and political phenomenon....A major contribution." —Choice

In *Complaint!* Sara Ahmed examines what we can learn about power from those who complain about abuses of power. Drawing on oral and written testimonies from academics and students who have made complaints about harassment, bullying, and unequal working conditions at universities, Ahmed explores the gap between what is supposed to happen when complaints are made and what actually happens. To make complaints within institutions is to learn how they work and for whom they work: complaint as feminist pedagogy. Ahmed explores how complaints are made behind closed doors and how doors are often closed on those who complain. To open these doors---to get complaints through, keep them going, or keep them alive---Ahmed emphasizes, requires forming new kinds of collectives. This book offers a systematic analysis of the methods used to stop complaints and a powerful and poetic meditation on what complaints can be used to do. Following a long lineage of Black feminist and feminist of color critiques of the university, Ahmed delivers a timely consideration of how institutional change becomes possible and why it is necessary.

Couples counseling is distinct from individual and family therapy and, while ideas from these other formats may be overlapping, applying theoretical concepts to couples has distinctive challenges. *Constructivist, Critical, and Integrative Approaches to Couples Counseling* is unique in that it addresses how to conceptualize various theories around a single case. By discussing only one case, the reader is more readily able to compare and contrast the theoretical ideas of each theory, as well as the pragmatics of techniques. Five theories are discussed around four consistent parts: history, theory of problem formation, theory of problem resolution, and case transcript. This book follows the same format as its companion *Behavioral, Humanistic-Existential, and Psychodynamic Approaches to Couples Counseling*.

Too often in practice, there is a tendency to pathologize clients, requiring a diagnosis as part of the helping relationship. Suppose, however, that most of the client problems that social workers encounter have more to do with the vagaries of life and not with what clients are doing wrong. This powerful idea is the philosophy behind the strengths-based approaches to social work. This groundbreaking practice handbook takes this concept one step further, combining the different strengths-based approaches into an overarching model of solution-oriented social work for greater impact. The strengths perspective emphasizes client strengths, goal-setting, and a shared definition of positive outcome. Solution-focused therapy approaches ongoing problems when they have temporarily abated, amplifying exceptions as solutions. This natural but rarely explored pairing is one component in the challenging and effective practice framework presented here by the authors, two seasoned practitioners with over 50 years of combined experience. By integrating the most useful aspects of the major approaches, a step-by-step plan for action emerges. With this text in hand, you will: - Integrate elements from the strengths perspective, solution-focused therapy, narrative therapy, and the strategic therapy of the Mental Research Institute (the MRI approach) into an effective and eclectic framework - Build and practice your skills using case examples, transcripts, and practical advice - Equip yourself with the tools you need to emphasize clients' strengths - Challenge the diagnosis-first medical model of behavioral health care - Collaborate with clients to get past thinking (first-order change), and more to acting "outside the box" (second-order change) - Learn to work with a wide variety of clients, including individuals, groups, and families; involuntary clients; clients with severe mental illness; and clients in crisis For any student or practitioner interested in working with clients towards collaborative and empowering change, this is the essential text.

The demand for residential communities for seniors rises as the U.S. population continues to age. This growth means that new administrators and staff members often are learning by trial and error the complicated task of delivering high-quality and consistent services to elderly persons. While many new facilities have been successful, others have been plagued by a variety of administrative and financial difficulties. *Senior Living Communities* remains the definitive guide to managing these facilities. In this thoroughly updated and revised edition, Benjamin W. Pearce offers a wealth of sound advice and practical solutions. He discusses resident relations, operating methods, staffing ratios, department management, cost containment, sales and marketing strategies, techniques of financial analysis, budgeting, and human resources. New chapters address issues particular to dementia care and architecture, and the appendix contains a department-by-department audit of senior living operations. From the front lines to the boardroom, this book should be a part of every decision-making process for improving and maintaining assisted living, congregate, and continuing care retirement communities.
